| ENVIRONMENTAL PROTECTION | UNITED STATES | 21/05/2019 | G/TBT/N/USA/1484 | <p>Distribution transformers</p> <p><i>The U.S. Department of Energy ("DOE") proposes clarifying amendments to the test procedure for distribution transformers to revise and add definitions of certain terms, to incorporate revisions based on the latest versions of relevant Institute of Electrical and Electronics Engineers (IEEE) industry standards, and to specify the basis for voluntary representations at additional per-unit loads (PULs) and additional reference temperatures. The proposals in this NOPR are minor revisions that do not significantly change the test procedure. Therefore, none of the revisions would pose undue burden on manufacturers. DOE is seeking comment from interested parties on the proposal.</i></p> | 07 July 2019 |
| ACCIDENT AND DISASTER CONTROL | UNITED STATES | 21/05/2019 | G/TBT/N/USA/1485 | <p>Airplane interior compartments</p> <p><i>The FAA proposes to revise its standards for pressurized compartment loads such that partitions located immediately adjacent to a decompression hole need not be designed to withstand certain decompression conditions. This action is necessary because, in some cases, it is not practical to design partitions in certain airplane compartments to withstand a large decompression event that occurs within that compartment. Even though individual partition failure would be allowed, continued safe flight and landing would still be required.</i></p> | 14 June 2019 |

| ROAD VEHICLE SYSTEMS | UNITED STATES | 21/05/2019 | G/TBT/N/USA/699/Add.1 | <p>Accelerator control systems - Addendum</p> <p>This action withdraws the notice of proposed rulemaking (NPRM) published in the Federal Register on 16 April 2012, proposing amendments to Federal Motor Vehicle Safety Standard FMVSS No. 124, Accelerator Control Systems. The NPRM proposed to make two amendments to the standard: add a new brake-throttle override (BTO) requirement to address unintended acceleration situations and amend the return-to-idle requirements to include electronic throttle control (ETC) systems. After further analysis of the comments received and other considerations, the agency has decided to withdraw the rulemaking proposal because: the widespread adoption of the BTO system makes FMVSS changes unnecessary and a broader understanding of safe design of vehicle electronic control systems is needed to make an informed decision on regulating return-to-idle on ETC systems.</p> | — |
