NOTICE TO RELEVANT STAKEHOLDERS

Dear Sir/Ma'am:

This refers to the draft regulations distributed through the World Trade Organization – Technical Barriers to Trade (WTO-TBT) website (www.epingalert.org) from 03 to 09 June 2023.

Relative thereto, we respectfully invite stakeholders to comment on the notified draft technical regulations from India:

Document Symbol	Notifying Member	Relevant Dates	Products Covered	Summary
G/TBT/N/IND/276	India	Date of Distribution: 08 June 2023 Deadline for Comments: 06 August 2023	Precision roller and bush chains, attachments and associated chain sprockets	<p>Precision Roller and Bush Chains, attachments and associated chain sprockets (Quality Control) Order, 2023</p> <p>Roller chain or bush roller chain is the type of chain drive most commonly used for transmission of mechanical power on many kinds of domestic, industrial and agricultural machinery, including conveyors, wire- and tube-drawing machines, printing press, automobiles and bicycles. It consists of a series of short cylindrical rollers held together by side links. It is driven by a toothed wheel called a sprocket. It is a simple, reliable, and efficient means of power transmission.</p>
G/TBT/N/IND/277	India	Date of Distribution: 08 June 2023 Deadline for Comments: 06 August 2023	Aluminium and aluminium alloy products	<ul style="list-style-type: none"> Aluminium is an important strategic metal for India's economy. After the iron and steel industry, aluminium is the second most important industry. It can be cast, melted, formed, machined, and extruded, allowing it to be formed into a variety of shapes and then fabricated to suit a wide range of applications. Aluminium is used in the production and distribution of electricity being a good conductor of electricity, household utensils and electric appliances, aircraft manufacturing, rail coaches,

BUREAU OF PHILIPPINE STANDARDS

				<p>nuclear and defence accessories, and so on.</p> <ul style="list-style-type: none"> • The downstream sector of Aluminium involves the transformation of aluminium into semi-finished products such as rods, bars, castings, forgings, and so on. Wrought aluminum is alloy of aluminum that has been subjected to mechanical working by processes such as rolling, extrusion or forging. Aluminium alloy tube is a type of round, hollow pipe made of Aluminium alloy, and is available in a variety of diameters and thicknesses. Aluminium tube has a huge range of uses from irrigation, automobile and other construction applications etc. Aluminum foils are produced by continuously casting and cold rolling aluminum sheets. Aluminum foil sheets are rapidly used in the manufacturing of various kinds of containers as per packaging requirements.
