G/TBT/N/US/2041	United States	<p>Date of Distribution: 28 August 2023</p> <p>Deadline for Comments: 26 October 2023</p>	Cybersecurity labeling for internet of things	In this document, the Federal Communications Commission (Commission) proposes measures to improve consumer confidence and understanding of the security of their connected devices--commonly known as Internet of Things (IoT) devices--that are woven into the fabric of their everyday lives. To provide consumers with the peace of mind that the technology being brought into their homes is reasonably secure, and to help guard against risks to communications, the Commission proposes a voluntary cybersecurity labeling program that would provide easily understood, accessible information to consumers on the relative security of an IoT device or product, and assure consumers that manufacturers of devices bearing the Commission's IoT cybersecurity label adhere to widely accepted cybersecurity standards.
