This publication seeks to provide cohesive information in a weekly basis on the foreign notifications of the WTO members under the TBT agreement on their proposed technical regulations and conformity assessment procedures.

Philippine exporters and relevant stakeholders are invited to review the proposed regulations. Comments that will be received by the BPS will be transmitted to the governments concerned for their consideration.

### IN THIS WEEK'S ISSUE

Notifications on Chemicals, Domestic and Commercial Equipment, Foods and Beverages, Health Care and Road Vehicles Engineering etc. from Brazil, Canada, the European Union, the United States of America, Ukraine and other countries are listed.

We would like to hear from you. For any questions, suggestions or requests for full text of notified regulations, please contact us at [bps@dti.gov.ph](mailto:bps@dti.gov.ph)

We are glad to be of service to you!

<b>AGRICULTURE</b>					
PESTICIDES AND OTHER AGROCHEMICALS	EUROPEAN UNION	06/01/2017	<a href="#">G/TBT/N/EU/437</a>	Pesticides - Picoxystrobin  <i>This draft Commission Implementing Regulation provides that the approval of the active substance picoxystrobin is not renewed in accordance with Regulation (EC) No 1107/2009. Existing authorised plant protection products containing picoxystrobin will be withdrawn from the market. The non-approval is based on the first evaluation of the substance for use as a pesticide active substance in the EU under Regulation (EC) No 1107/2009. The substance was formerly approved under Directive 91/414/ EEC.</i>	60 days from notification

				<i>This decision only concerns the placing on the market of this substance and does not affect the Maximum Residue Levels (MRLs) for residues of the concerned pesticide. However, following non-approval, separate action will be taken to lower MRLs to the limit of quantification (LOQ). A separate notification will be made in accordance with SPS procedures in relation to action taken on MRLs.</i>	
<b>AIRCRAFT AND SPACE VEHICLE ENGINEERING</b>					
AIRCRAFT AND SPACE VEHICLES IN GENERAL	UNITED STATES	06/01/2017	<a href="#">G/TBT/N/USA/1002/Add.1</a>	<p>Transponder equipment - Addendum</p> <p><i>The FAA is withdrawing a previously published advance notice of proposed rulemaking that sought public comment from interested persons involving glider operations in the National Airspace System. The action responded to recommendations from members of Congress and the National Transportation Safety Board and was intended to gather information to determine whether the current glider exception from transponder equipage and use provides the appropriate level of safety in the National Airspace System. The FAA is withdrawing that action because the limited safety benefit gained does not justify the high cost of equipage. This action becomes effective 23 December 2016.</i></p>	—

WATER HEATING EQUIPMENT	UNITED STATES	06/01/2017	<a href="#">G/TBT/N/USA/1133/Add.2</a>	<p>Commercial water heating equipment - Addendum</p> <p><i>In this NODA, the U.S. Department of Energy (DOE) presents its updated analysis used to convert the potential energy conservation standard levels the Department has considered for residential-duty commercial gas-fired storage water heaters from thermal efficiency and standby loss metrics to the uniform energy factor (UEF) metric, as required by a recent change in law. In a notice of proposed rulemaking (NOPR) for energy conservation standards for commercial water heating equipment published on 30 May 2016 ("May 2016 CWH ECS NOPR"), DOE analysed these potential standard levels for residential-duty commercial gas-fired storage waters in terms of thermal efficiency and standby loss, and converted the levels to UEF using conversion factors that were proposed in a separate NOPR published on 15 April 2015 ("April 2015 conversion factor NOPR") . However, DOE subsequently published a supplemental NOPR ("August 2016 conversion factor SNOPR") in the conversion factor rulemaking in response to new data on 30 August 2016, and recently issued a conversion factor final rule ("6 December 2016 conversion factor final rule") based upon the August 2016 conversion factor SNOPR, which finalized updated conversion factor equations. (See Docket EERE-2015-BT-TP-0007) . This NODA presents the thermal efficiency and standby loss levels analysed in the May 2016 CWH ECS NOPR for residential-duty gas-fired storage water heaters in terms of UEF, using the recently updated conversion factors adopted in the 6 December 2016 conversion factor final rule.</i></p>	09 January 2017
